Welcome to the Graduate School of Media Design

Innovate through disruptive creativity

Masa Inakage
Dean and Professor
Keio University Graduate School of Media Design

The mission of the Keio University Graduate School of Media Design (KMD) is to develop media innovators who have the ability to innovate on their own to create social value. Media innovators who are able to go beyond specific disciplines and national borders and be active on the global stage will be the leaders in the creative society of the 21st century.

The creative society accelerates

The greatest changes to existing social systems since the industrial revolution are occurring now in the 21st century. People are venturing beyond the confines of the state and industry to engage on a broader scale, and likewise, universities are collaborating across disciplines and national borders. Creativity is essential if we are to capitalize on these rapid changes to build a new society. This entails activities that transform key frameworks for economic and other social activities. In a word, it's innovation. Rather than taking the conventional problem-solving approach, research and education at KMD uses innovation to propose new value to society and to create new markets. At KMD, we utilize a wide range of techniques for disruptive innovation to iteratively develop and prototype original ideas, a process we refer to as "MAKE." However, this is just the first step. We also conduct research and then deliver our prototypes to society in the stage we call "DEPLOY." After deployment, we conduct more research on actual implementation and on the social "IMPACT" of the outcome. The entire process is supported by disruptive creativity, which views objects and phenomena from a wide range of perspectives, develops new ideas, expressions, and processes from zero, and conveys unique social value.

Seeking social impact

The focus of KMD activities is on innovating out of zero, bringing those innovations to market, and creating social impact. We call this the "Real Project." In addition to contributing to academic inquiry, our objective is to impact the global creative society by developing new products, services and businesses, formulating new standards, and recommending changes to systems and institutions. In the Real Project, our aims are to foster innovation and to train transnational minds to understand how to facilitate collaboration among regions, identify relevant global commonalities, and adapt their ideas and products to local tastes and needs. Our teams bring together a diverse range of specialties and cultural values so that students have the opportunity to learn and gain practical experience in 21st century-style leadership that will allow them to maximize their potential.

Global leaders are cosmopolitan

In our globalized society, we use the term "cosmopolitan" to refer to a person who understands the unique cultural and economic value of a region, respects the differences among regions, and is able to go beyond the framework of his or her own discipline to collaborate. To provide opportunities for our students to become more cosmopolitan, KMD has established a number of locations that it operates on its own or in partnership with institutions in Japan and overseas, and also collaborates on numerous projects with its international partners.

2.6 Examination Paper

Compile an Examination Paper containing your (1) Statement of Purpose (SoP) and answers to the (2) Questions stated below.

(1) Statement of Purpose (SoP)

Provide details of your motivations for applying to the Graduate School of Media Design (KMD), a summary of your proposed research activities while enrolled, and your career aspirations upon completion of the master's program within two pages. Because the specific research activities of students are determined through consultation with the academic advisor for the project they join, it may not be possible to conduct the envisaged research activities described in the SoP.

(* Important notes regarding Statement of Purpose (SoP).

- Use either A4 or letter-size paper (print out vertically on single-sides and write horizontally from left to right).
- The smallest font that may be used is 11 point.
- A cover sheet is not required. In the top right-hand corner of the front page (pg. 1) write out your

full name and examinee number.

- At the bottom of each page write the page numbers (current page and total number of pages, e.g., 1/3, 2/3, 3/3).
- Please note that examination papers exceeding the designated number of pages will be deemed invalid and will not be assessed.
- Students applying for the April admission should write in Japanese, while students applying for the September admission should write in English.

(2) Questions

We live in a rapidly changing society. Neuroscience is uncovering the nature of human capabilities, while the Internet has greatly shaken preexisting mechanisms, not only in terms of information, but also in relation to the movement of goods and people. Even after 30 years of globalism that seeks homogenization on a global scale, we are still confronted by the reality of a diverse world. This demands a transnationalism that both enhances integration while respecting cultural uniqueness. Meanwhile, unfettered capitalism has caused the polarization of society, showing no signs of abating. Within such complex and difficult social conditions, innovation is now being sought. Innovation refers to activities that bring about large benefits or social changes through identifying the elements that make up existing social and technological systems, the development of concepts for integration into systems separate to those that have been used up until the present, and securing understanding for and the utilization of these concepts by demonstrating them to people. KMD offers a cutting-edge curriculum for fostering human resources that will take the lead in the creation of such innovations, which we call media innovators.

The Graduate School of Media Design simultaneously conducts activities and education in four different areas: a “Technology” track for learning about Internet technologies; a “Design” track for the development of innovative concepts and developing prototypes; a “Management” track for the realization of innovation in business; a “Policy” track that realizes innovation through social and institutional change. KMD endeavors to nurture human resources as media innovators who have mastered these four creative skills.

Persons who wish to enroll at KMD should choose one of the following two admission procedures (Method A and Method B).

[Method A]

Answer questions 1 to 4 below within 4 sheets of A4.

Question 1: If you had to choose one of the four areas above (Technology, Design, Management, Policy), which would you join? Select one area and give a detailed explanation of your reasons.

Question 2: Provide an explanation of something that you would like to innovate or think should be innovated. Give three or more specific reasons.

Question 3: How would you yourself go about realizing the innovation discussed in question 2? Do not only focus on your chosen area from question 1 (Technology, Design, Management, Policy), but prepare a strategy that incorporates

each of the other areas as well. Strategy here refers to the setting of a goal and the process for its attainment, which combines various case studies.

Question 3.1: What is your goal?

Question 3.2: State three things necessary for achieving this goal within your chosen area.

Question 3.3: State three things you think are necessary for each of the remaining areas respectively.

Question 4: Freely develop an innovation strategy from the standpoint of the area you chose in question 1, bearing in mind the problems described in question 2 and your answers to question 3. Investigate thoroughly and present concrete examples and case studies. A strategy is comprehensively assessed by emphasizing the two points of clarity and originality.

(* Important notes regarding examination papers for Method A.

- Use either A4 or letter-size paper (print out vertically on single-sides and write horizontally from left to right).
- The smallest font that may be used is 11 point.
- A cover sheet is not required. In the top right-hand corner of the front page (pg. 1) write out your full name and examinee number.
- At the bottom of each page write the page numbers (current page and total number of pages, e.g., 1/3, 2/3, 3/3).
- Please note that examination papers exceeding the designated number of pages will be deemed invalid and will not be assessed.
- Students applying for the April admission should write in Japanese, while students applying for the September admission should write in English.

[Method B]

Applicants with the following accomplishments will be examined by KMD based on the submission of materials.

1. Applicants with achievements in science and technology should submit corresponding materials for the corroboration of said achievements (papers, patents, etc.). Submit a maximum of five items, excluding graduation theses.
2. Applicants with achievements in design, music, or art should submit a portfolio of a maximum of 10 works.
3. Applicants with achievements in science and technology should submit corresponding materials for the corroboration of said achievements (papers, patents, etc.). Submit a maximum of five items, excluding graduation theses.
4. Applicants with achievements in design, music, or art should submit a portfolio of a maximum of 10 works.

(* Important notes regarding examination papers for Method B.

- Submitted materials and works will not be returned.
- Attach a summary if the materials or works are in electronic format such as DVDs.

- Materials and works in languages other than Japanese or English must be submitted with either a Japanese or English translation.
- In the top right-hand corner of the front page of each material write out your full name and examinee number (only if it is possible to write).

2.7 Contacting Faculty Members

You may contact any KMD faculty members you wish regarding your research proposal and other relevant matters before submitting your application (contacting faculty members is not mandatory).
